About Us

Intelligent Ponds Company is a Saudi company based in Riyadh, specialized in providing comprehensive and modern solutions in the fields of aquaculture, poultry, and livestock production.

We focus on reducing construction and operational costs for our clients while improving production efficiency and upgrading existing farms by integrating the latest technologies and practical expertise.

Our Vision

To be the leading partner in **enhancing the efficiency of aquaculture, poultry, and livestock projects** through innovative technologies that help **reduce costs and increase productivity**, in line with investors' aspirations and in support of achieving food security.

Our Mission

Empowering investors and farm owners **to maximize the outcomes of their projects at the lowest possible cost** through:

- Construction and operational solutions that reduce expenses and increase profitability.
- Development of existing farms using the latest technologies and practical expertise.
- Supplying high-performance and reliable products that ensure production sustainability and improved quality.

Our Services

Developing Existing Farms and Increasing Their Production

By providing experienced operators,
technicians, and engineers.

Cost-Reduction Solutions for Construction and Operation

Including non-medicated feed additives,
aeration devices, prefabricated ponds,
and their installation.

Fish Farm Construction and Supervision

through:

- Supplying high-quality prefabricated ponds.
- Installing all types of strategic aquaculture systems.
- Providing all necessary feed additives and disinfectants.

Our Products

Oxmore

designed to maintain oxygen levels within the normal range during emergencies and power outages.

Viral Aquatic

A high-efficiency disinfectant effective against aquatic pathogens, helping to increase production and reduce losses.

Sanolife PRO-F

The ideal compound for increasing the weight of fish and crustaceans by improving feed conversion rates, and the optimal formula for maintaining digestive health and stimulating the immune system against pathogens.

Sanolife PRO-W

A beneficial bacteria product that reduces water exchange rates, improves the aquatic environment, enhances fish resistance to pathogens, and stimulates the growth of natural feed in culture ponds.

Fish pond

Fish ponds of all sizes, the optimal and most cost-effective solution for providing an ideal environment for raising fish and crustaceans.

Min Max

A mineral blend that enhances feed conversion rates, reduces mortality, and lowers the incidence of bacterial or viral infections.

air blower specially designed for fish farms

Designed to deliver large volumes of air with low power consumption, providing high efficiency in supplying the oxygen required for fish, which helps improve their health and welfare on the farm.

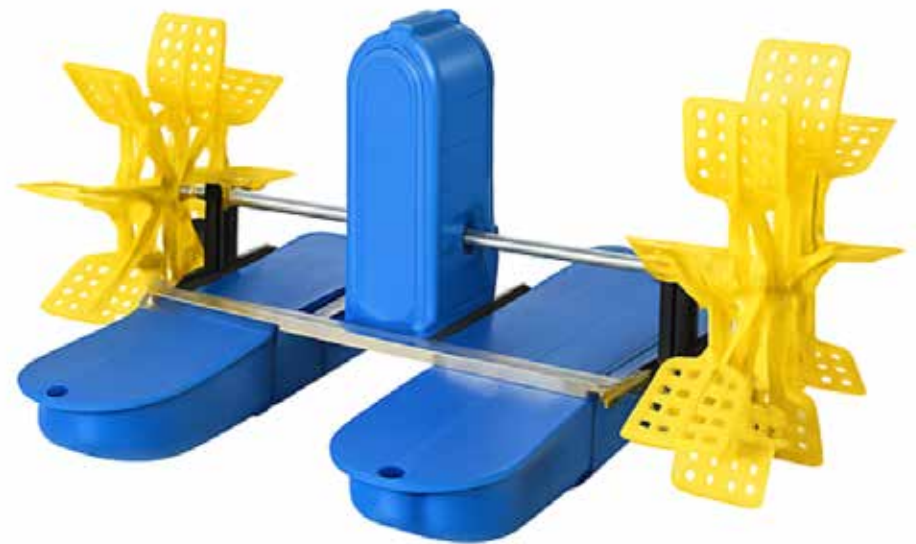

- Available in various sizes.

Fish aeration paddles

Specifically designed to meet the needs of fish farms, featuring high quality and energy efficiency, resulting in higher oxygen production and lower power consumption.

- Available in various sizes.

Disc Diffuser Air Distributor

Designed to efficiently distribute air in aquaculture aeration systems, featuring a unique design that ensures even and uniform air distribution throughout the pond or farm.

- Available in various sizes.
